

This archive contains Avery Lee's NTSC XEP80 Ultra Speed Driver modified for the XEP80-II as Atari DOS 2.5 and BW-DOS 1.3 boot disks. These are designed to automatically toggle the XEP80-II into 80 column mode upon execution.

Here are the individual drivers and packaged auto-booting ATR files along with their descriptions.

### ***XEP80-II 80 column Toggle Program***

- **XEP2TOG.pdf:** Toggle program source listing
- **XEP2TOG.SRC:** Toggle program Assembler/Editor 80 column Source
- **XEP2TOG.OBJ:** Toggle only program – no XEP80 driver

### ***XEP80-II Stand-Alone Ultra Speed Driver Only (combined with Toggle program)***

- **XEP8UTOG.SYS:** Ultra Speed XEP80-II Driver

### ***XEP80-II Boot Disks (includes Auto-Run Ultra Speed Driver)***

- **BWDOS 1.3 XEP80-II.atr:** BWDOS 1.3 Ultra Speed XEP80-II Driver
- **DOS 2.5 XEP80-II.atr:** Atari DOS 2.5 Ultra Speed XEP80-II Driver
